

Carbide Replacement Trial Record

Extramet Products | Supporting worksheet, not a controlled engineering drawing

Part and drawing revision

Baseline material and failure mode

Baseline good parts / service interval

Baseline replacement and downtime cost

Candidate material and geometry changes

Trial conditions and sample quantity

Acceptance criteria before the trial

Observed wear / breakage / dimensional loss

Good parts and total operating cost

Decision and technical reviewer

Send the completed worksheet with your drawing: <https://extramet.net/rfq/>
